Part 1: Data Mining, Machine Learning and Text Analytics

Exercise 1:

All exercise 1 screenshots support answers are in Appendix.

1. Data Mining and Machine Learning

d.

- 1) Status Category 96NK L level has the highest count.
- 2) Yes, the variable Age contain 26,477 missing values.
- 3) The average of Target Gift Amount is 15.62.

e.

- 1) Responders and non-responders each account for half of the data.
- 2) 28,699 females responded to the campaign.

Training a Neural Network Model in SAS Visual Data Mining and Machine Learning

h.

- 1) 64,988 observations are used by algorithm.
- 2) Because many modelling algorithms in SAS Visual Data Mining and Machine Learning operate under complete case analysis, which algorithms use only cases with no missing data. All observations here which are not used have missing data.
- 3) The misclassification rate for the model created with default settings is 0.4751.
- i. The updated model produces a validation misclassification rate of 0.4379, which indicates a slight improvement over the previous result.

i.

- 2) The updated model produces a validation misclassification rate of 0.4393.
- 3) The updated model produces a validation misclassification rate of 0.3755. This represents a significant improvement over previous result.
- 4) The top 10% (percentile) of the data has about 1.58 times as many responders as a random ordering of the data, and 0.32 times fewer responders than a perfect ordering of the training data.

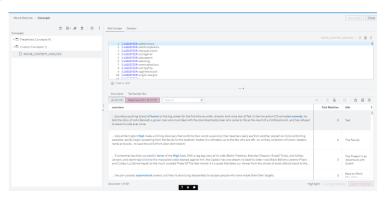

Exercise 2:

Comedies:

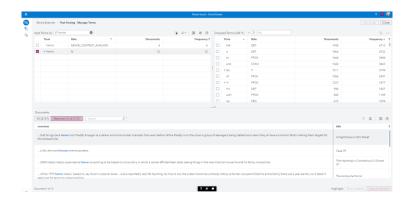

- The Meaning of Life
- Chasing Amy
- American Reunion

Horrors:

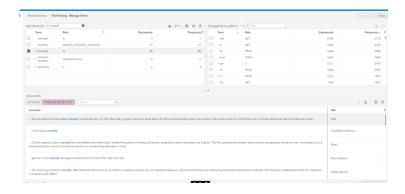

- Monster House
- Case 39
- Scary Movie 2

Appendix:

Part 1: Exercise 1

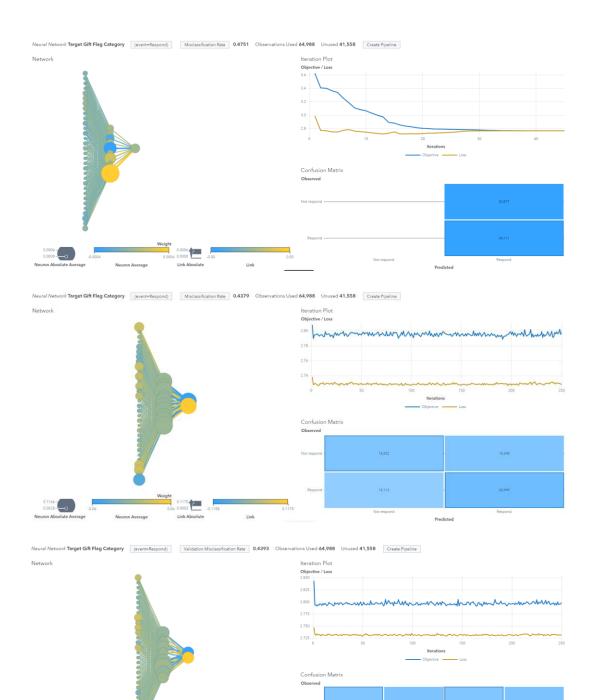

Name	Minimum
Age	0.00
Gift Amount Average 36 Months	0.00
Gift Amount Average All Months	1.50
Gift Amount Average Card 36 Months	1.33
Gift Amount Last	0.00
∨ More information	
Standard Deviation:	16.52
Standard Error:	0.06
Variance:	272.76
Distinct Count:	79
Number Missing:	26,477

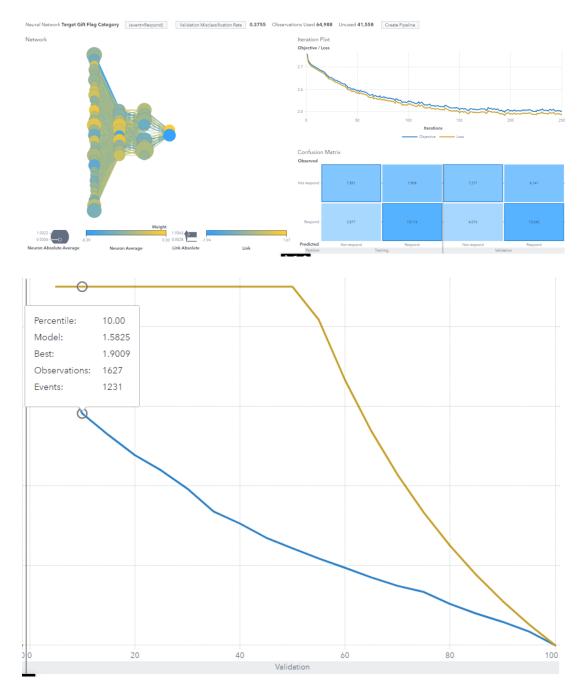

Name	Minimum	Maximum	Average	Sum
· ,				
Target Gift Amount	1.00	200.00	15.62	832,355.70

■ F ■ M ■ U
